# Comprehensive end-to-end solution

Recharge Connect offers a comprehensive end-to-end electric vehicle (EV) charging solution designed to simplify the transition to sustainable mobility for businesses.

From tailored consultations and seamless installation to dynamic software management, smart booking features, and proactive maintenance, our holistic approach ensures a hassle-free and user-centric experience.

With a focus on sustainability and revenue potential, Recharge Connect is your trusted partner for unlocking the future of EV charging.

# Expert surveys and installation

Our expertise shines through every step of the process, starting with our comprehensive survey and consultation. Our seasoned professionals meticulously assess your site's unique requirements, ensuring a tailored charging solution. From there, we take the reins, overseeing all aspects of installation, including electrical and ground works.

Our team handles it all, from wiring to infrastructure setup, guaranteeing a seamless and hassle-free experience for you. With Recharge Connect, rest assured that your EV charging journey is in the hands of capable experts who prioritize precision and efficiency in every detail.

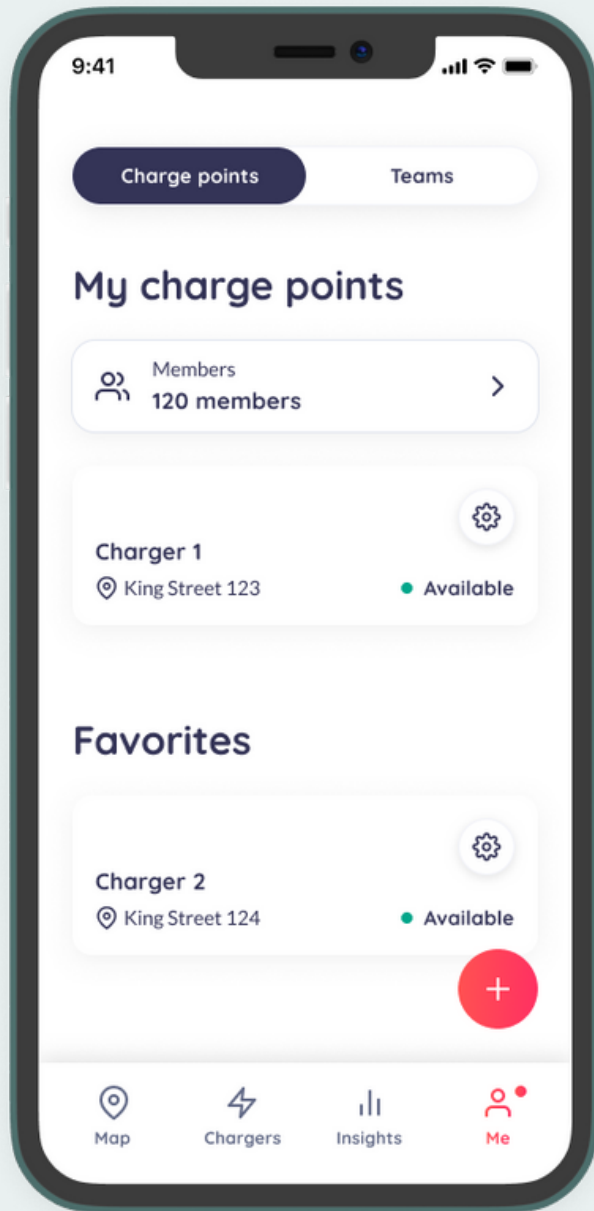

## Proactive repairs and maintenance

At Recharge Connect, our commitment extends beyond installation. We offer comprehensive maintenance and repair services to ensure your charging infrastructure operates flawlessly.

Our lifetime maintenance plan offers partner sites the reassurance that a single monthly payment will cover a scheduled annual maintenance check, as well as any repairs to the unit. In instances where repairs are not feasible, we seamlessly arrange for component replacement or even a whole unit replacement.

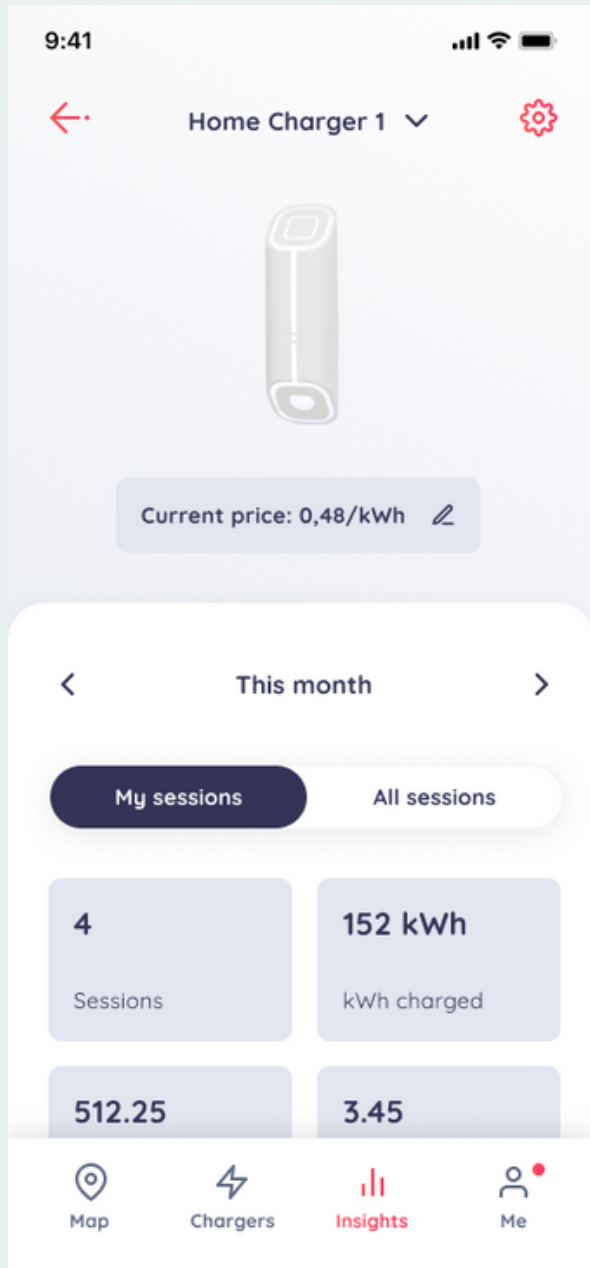

# Advanced charge point management software

Recharge Connect's cutting-edge management software is the driving force behind the seamless operation of your EV charging infrastructure. Our intuitive platform offers real-time insights and control, enabling remote monitoring, dynamic pricing adjustments, and comprehensive reporting.

With user-friendly interfaces, clients can easily manage multiple charging points, enabling custom pricing structures, and optimising utilisation. Our software ensures that both business owners and end-users enjoy a hassle-free experience, making EV charging management efficient, transparent, and tailored to your unique needs.

# Effortless payment solutions

At Recharge Connect, we understand the importance of a seamless and convenient charging experience for both business owners and users. Our effortless payment solutions take the hassle out of the payment process. With multiple payment options, including mobile apps, credit cards, and RFID technology, users can choose the method that best suits them.

Schedule price changes for different times of day, create user groups and offer different tariffs, create a monthly subscription plan and offer discount codes. There are plenty of options to attract clients to your business and use your charge points.

# Unlock **new** revenue streams

Installing an EV charge point from Recharge Connect isn't just about sustainable mobility – it's also a strategic business move. By offering convenient charging services, businesses can attract a new wave of eco-conscious customers who actively seek out EV-friendly establishments. This influx of customers presents a unique revenue

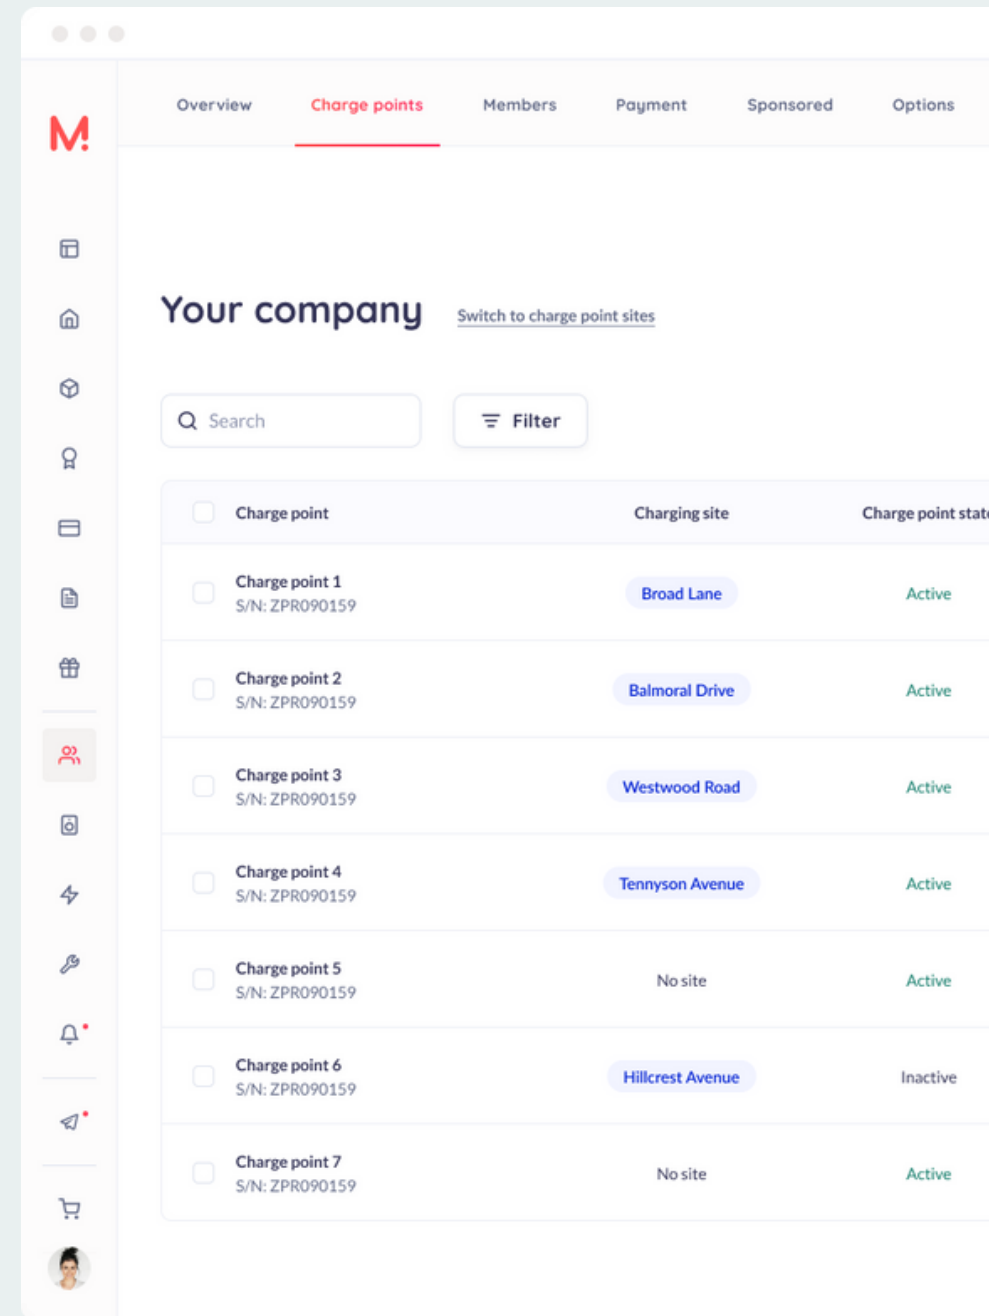

generating opportunity, whether through increased foot traffic, longer stays, or added patronage to associated services. With Recharge Connect, businesses can tap into a burgeoning market while reinforcing their commitment to sustainability, thereby securing a competitive edge in an evolving landscape.

# Expansion and futureproofing

Recharge Connect is committed to not only meeting your current EV charging requirements but also anticipating your future needs. Our solutions are designed to be scalable and future-proof, ensuring that your charging infrastructure can accommodate increasing demand without disruption.

As the electric vehicle market evolves and technologies advance, our expert team stays ahead of the curve, offering seamless upgrades and enhancements to keep your charging points cutting-edge.

The screenshot displays the 'Charge points' section of the Recharge Connect dashboard. The interface includes a navigation menu on the left with icons for various functions, a top navigation bar with tabs for 'Overview', 'Charge points', 'Members', 'Payment', 'Sponsored', and 'Options', and a main content area titled 'Your company' with a 'Switch to charge point sites' link. Below this, there is a search bar and a filter button. The main content area features a table with the following data:

<input type="checkbox"/>	Charge point	Charging site	Charge point status
<input type="checkbox"/>	Charge point 1 S/N: ZPR090159	Broad Lane	Active
<input type="checkbox"/>	Charge point 2 S/N: ZPR090159	Balmoral Drive	Active
<input type="checkbox"/>	Charge point 3 S/N: ZPR090159	Westwood Road	Active
<input type="checkbox"/>	Charge point 4 S/N: ZPR090159	Tennyson Avenue	Active
<input type="checkbox"/>	Charge point 5 S/N: ZPR090159	No site	Active
<input type="checkbox"/>	Charge point 6 S/N: ZPR090159	Hillcrest Avenue	Inactive
<input type="checkbox"/>	Charge point 7 S/N: ZPR090159	No site	Active

## Maximising ROI and profitability

At Recharge Connect, we understand that investing in EV charging infrastructure is not only about sustainability but also about driving profitability. Our strategic approach is geared towards helping businesses achieve a rapid return on investment (ROI), typically within three years. By attracting new customers, increasing customer loyalty, and capitalising on new revenue streams, our solutions

create a tangible impact on your bottom line. Additionally, our expertly managed dynamic pricing and efficient operations enhance utilisation, ensuring that your charging points are working to maximize your ROI. With Recharge Connect, your investment not only supports a greener future but also accelerates your financial success.

# Informed decision making

In the digital age, information holds significant power, and Recharge Connect's data-driven insights provide a valuable advantage. Our advanced management software captures essential usage data, enabling well-informed decisions to shape your EV charging strategy. From understanding peak usage times to analysing revenue patterns, our comprehensive reports offer a clear view of

your charging infrastructure's performance. This knowledge empowers you to refine pricing structures, fine-tune operational strategies, and adapt to evolving customer behaviours. With Recharge Connect's data-driven insights, you're not just providing charging solutions – you're crafting a strategy that heightens customer experiences and optimises your business potential.

The screenshot shows a web interface for 'Reports'. At the top left, the word 'Reports' is displayed in white on a red background. In the top right corner, there is a 'Settings' button. Below the header, the section 'Your reports' is visible. This section contains several interactive elements: a 'Start Date' field with a calendar icon, an 'End Date' field with a calendar icon, a 'Filter' button with a list icon and a close 'X' icon, a 'Search' input field, and an 'Actions' button with a gear icon. Below these controls is a table header with the following columns: 'SELECTED 0 DESELECT ALL', 'REASON', 'CHARGE POINT', 'SITE', 'TEAM', 'SOURCE', 'PRIORITY', 'STATE', and 'ACTIONS'. The table body is currently empty.

# Reports for a sustainable impact

At Recharge Connect, we're not just about facilitating charging – we're dedicated to providing actionable insights that make a difference. Our advanced management software generates comprehensive reports, offering a wealth of valuable data.

One such report focuses on carbon offset, quantifying the positive environmental impact of your charging infrastructure. By tracking CO2 emissions reduced through EV charging, you can proudly showcase your commitment to sustainability.

# Invest in an **exponentially** growing market

The rapidly growing electric vehicle (EV) market offers compelling reasons for businesses to invest. With global sustainability goals in mind, transitioning to EV infrastructure isn't just a compliance move; it's a strategic choice.

Businesses that embrace this shift tap into a burgeoning customer base actively seeking EV-friendly services. The financial incentives, including government support and potential revenue streams, make this investment even more attractive.
